PANJALA DEEPTHI

Electronics & Communication Engineering Student | Python | C | Data Structures

7981044863 | deepthipanjala02@gmail.com | Hyderabad, Telangana, India

CAREER OBJECTIVE

Enthusiastic second-year Electronics and Communication Engineering student with a CGPA of 9.4, interested in electronics, programming, artificial intelligence, embedded systems, and IoT. Possess foundational skills in Python, C, Data Structures and Algorithms, and electronic circuits. Seeking an internship to gain hands-on industry experience, strengthen technical skills, and contribute to practical engineering projects.

EDUCATION

Bachelor of Technology – Electronics and Communication Engineering
Mallareddy Engineering College for Women, Hyderabad | 2nd Year
CGPA: 9.4

Intermediate (12th Grade): 963 marks **10th Grade:** 9.5 CGPA

TECHNICAL SKILLS

Programming: Python, C

Data Structures & Algorithms: Linked Lists, Stacks, Queues, Trees, Basic Problem Solving

Electronics: BJT, JFET, Diodes, Rectifiers, Amplifiers, Electronic Circuits

Tools & Technologies: MATLAB, Git/GitHub, Ollama, Streamlit, LangChain/LangGraph

PROJECTS

Resume Generator Using Python

- Developed a Python-based application for generating resumes from user-provided information.
- Used functions, strings, file handling, and basic application logic.

Zener Diode-Based Voltage Regulation System

- Studied and designed a voltage regulation system using a Zener diode.
- Analyzed voltage regulation characteristics and the operation of the circuit.

AI-Based Travel Planner

- Developed the concept of an AI-assisted travel planner using Python and LLM technologies.
- Designed features for destination planning, hotels, transportation, and places to visit.

RELEVANT COURSEWORK

Programming in C • Python Programming • Data Structures & Algorithms • Electronic Devices & Circuits • Analog Electronics • Digital Electronics • Network Fundamentals • Engineering Mathematics

AREAS OF INTEREST

Embedded Systems • IoT • Artificial Intelligence • Robotics & Automation • Electronics & Communication

KEY STRENGTHS

Problem Solving • Quick Learning • Technical Curiosity • Teamwork • Communication • Consistent Academic Performance

ADDITIONAL INFORMATION

Interested in internships and practical learning opportunities in ECE, embedded systems, IoT, AI, robotics, and software-oriented engineering roles.
